Other quizzes from Assistive Technology Journal articles may be found on the RESNA website (www.RESNA.org). The primary program learning objective is to keep abreast of current findings and practices in assistive technology, research and rehabilitation engineering.

Was the content of the article relevant to current AT practice? Yes No

Was reading the article and completing the quiz a good way for you to learn? Yes No

Quiz 21.2b – Techniques and Recommendations for the Inclusion of Users with Autism in the Design of Assistive Technologies.

1. True/False There has recently been a trend to develop aids based on digital technologies that are more discrete and socially acceptable.
2. It was reported that _____ of all assistive devices are abandoned primarily because there is a lack of user input into the selection and design of such devices.
 - A. $\frac{1}{2}$
 - B. $\frac{1}{3}$
 - C. $\frac{1}{4}$
 - D. $\frac{1}{5}$
3. The _____ Method is described as a method for the systematic solicitation and collation of judgments on a particular topic through a set of carefully designed sequential questionnaires interspersed with summarized information and feedback of opinion derived from earlier responses.
 - A. Alpha
 - B. Olympus
 - C. Delphi
 - D. Omega
4. _____ experts on autism participated in this study.
 - A. 3
 - B. 5
 - C. 6
 - D. 7
 - E. 9
5. One panelist worked mainly with autism and another mainly with _____ Syndrome.
 - A. Asperger's
 - B. Augsberger's
 - C. Stauffenberger's
6. Which of the following was NOT a technique selected for the studies:
 - A. role play (doll's house)
 - B. video
 - C. self-photography
 - D. playback (instant replay)
 - E. think aloud

7. True/False Anonymity was not a significant factor for this project because it was very unlikely that the prospective panelists would know each other, either personally or by reputation, thereby possibly influencing their responses.
8. To ensure that the advice would be provided in a common form, _____.
- A. multiple copies of a written report were provided
 - B. the panelists' responses were recorded
 - C. a template was designed
9. T/F Round three was designed solely as a voting round.
10. The designer must be cognizant of the client's psychological issues and skills, and build in a _____ word that has been regularly used (e. g. "escape", "sanctuary", etc.).
- A. safety
 - B. code
 - C. pass
 - D. key
11. It is vital to consider the _____ abilities of the user/client.
- A. aural
 - B. visual
 - C. kinesthetic
12. True/False Establishing that the client has a clear knowledge of what is happening or supposed to happen is helpful but not critical.
